MACRO WHEY

ADVANCE PROTEIN FORMULA

Gen-Tec's Macro Whey contains a unique synergistic formula scientifically formulated to help gain lean muscle, boost performance and speed recovery. Macro Whey contains the highest quality whey protein available in the world today. Whey peptides have been extracted using the latest in advanced technology, a cold micro and ultrafiltration process. This ensures an undenatured, low lactose protein. The technology has also provided an instantising process which enables quick, easy mixing. It has taken years of research for the development team at Gen-tec Nutrition to produce a unique enhanced protein matrix which maximises whey protein's function. Precise amounts of micro and macro nutrients have been combined in Macro Whey for applied function:

SUSTAINED RELEASE

Instantised WPI, WPC and Micellar Casein provide short, medium and long chain peptides for a sustained release of amino-acids into the bloodstream.

IMMUNE AND DIGESTIVE SYSTEM

It has been discovered that Colostrum offers a wide spectrum of health benefits for adults ranging from enhancement of immunity to the improvement of the digestive system. At Gen-Tec we use "First Milking Colostrum" from Australian pasture fed dairy cows using a patented collection and processing technique. Our Colostrum has a guaranteed minimum of >35% of total immunoglobulin (IgG) content and is of therapeutic grade.

SPECIFIC AMINO ACID PROFILE

High in branch chain amino acid's with added LGlutamine make Macro Whey ideal for specific muscle recovery and growth.

NITROGEN RETENTION

The slower digesting Micellar Casein plus EFA's (Essential Fatty Acids) are present in Macro Whey to assist nitrogen retention and to eliminate catabolism (Muscle loss).

PROTEIN SYNTHESIS

Vitamin B6 (pyridoxine) and creatine monohydrate have been included to encourage protein metabolism and synthesis.

CELL VOLUMIZING AGENTS

Creatine Monohydrate (CM) and Glycerol will help provide a fuller harder looking muscle with greater leverage by increasing muscle cell water volume.

GEN-TEC
NUTRITION

100% Australian Owned and Manufactured. Gen-Tec sources the world's finest quality raw materials and use internationally recognised bio chemists to produce leading products that live up to my expectations!

PRODUCT INFORMATION

ENERGY

Creatine Monohydrate increases Creatine Phosphate (CP) stores in muscle for more contractions in a power based environment.

Gen- Tec Nutrition held on to the belief throughout the development process of Macro Whey, results for the consumer are the highest priority. Much time was spent in the lab to deliver the worlds finest tasting and easy mixing enhanced protein formula.

SIZES

Available in 400g, 1.2kg, 3kg

FLAVOURS

Chocolate Cream, Vanilla Cream
